Patnitala, Naogaon, Rajshahi

Bachelor of Science in Computer Science and Engineering (May 2020 - January 2026)

Career Objective

Passionate Frontend Developer skilled in React, Next.js, Tailwind CSS, and modern JavaScript. Experienced in building responsive UI, dynamic dashboards, authentication systems, and smooth user experiences. Eager to solve real-world problems, learn new technologies, and contribute to a collaborative engineering team.

Technical Skills

Expertise: JavaScript (ES6), React.js, Tailwind CSS, HTML5, CSS3, Firebase

Comfortable: Next.js, REST API integration, Chrome DevTools, Bootstrap

Familiar: Axios, React Query, JWT Auth, Git

Tools: Git & GitHub, VS Code, Netlify, Vercel

Soft Skills: Teamwork, Communication, Problem-Solving, Time Management, Adaptability

Projects

Movie Master Pro - (Nov 2025 - Nov 2025)

[live](#) | [Github](#)

A full-stack movie management platform where users can browse movies, manage personal collections, and explore content using advanced filters.

- Personalized Collections: Full CRUD for movie collections and watchlists.
- Advanced Filtering: Search by genre, rating, and keywords.
- Modern UI: Responsive interface with animations using React, Tailwind, DaisyUI, Framer Motion, React-Toastify & SweetAlert2.
- Full-Stack Setup: Node.js, Express, MongoDB backend with Firebase authentication; deployed on Firebase Hosting & Vercel.

Zap-Shift Delivery System - (Nov 2025 – Dec 2025)

[live](#) | [Github](#)

A delivery management system with real-time parcel tracking, rider coordination, and a multi-role dashboard.

- Parcel Tracking: Real-time updates for users, admin, and riders.
- Rider Management: Rider assignment, area preferences, and application system.
- Role-Based Dashboard: Dedicated dashboards for Admin and Rider with delivery status and analytics.
- Responsive UI: Built with React, Tailwind, Framer Motion, Axios, React Query, and MongoDB

Dragon News Breaking - (Oct 2025 - Oct 2025)

[Github](#)

A responsive and modern news application that delivers real-time updates using Firebase. Designed with a clean UI and smooth UX, featuring a live scrolling news ticker, formatted date display, and intuitive client-side routing for seamless navigation.

- Real-Time News: Integrated Firebase for instant data updates.
- Smooth UI/UX: News ticker using React Fast Marquee, clean layout with TailwindCSS & DaisyUI.
- Client-Side Routing: Fast navigation via React Router.
- Optimized Performance: Built with Vite for speed and efficient development.
